## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 21, line 10, there is no antecedent basis for “said first and second nonwoven sheet members”. It appears “nonwoven sheet” should be deleted since it is really the entire member that is being referenced. Likewise, in line 17, it appears “sheet” should be deleted such that it is the members that is being referenced.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3727

Claims 21-33 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 3, 4, 2 and 5-12, respectively, of U.S. Patent No. 7,401,376 in view of Rasmason (US patent 4,154,542). Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims set forth a disposable nonwoven cleansing mitt substantially as claimed with the exception of an adjustment means in the form of an elastic material to permit a variation in the size of the interior volume of the mitt.

The patent to Rasmason discloses a cleansing mitt that includes an adjustment means (19) in the form of an elastic layer attached thereto to permit a variation in the size of the interior volume of the mitt. It would have been obvious to one of skill in the art to provide the mitt in the claims of the '376 patent with an adjustment means, as clearly suggested by Rasmason, to enable differently sized users to comfortably wear the mitt.

Claims 21-33 are directed to an invention not patentably distinct from claims 1-12 of commonly assigned US patent 7,401,376. Specifically, the addition of the adjustment means between the patented claim 1 and claim 21 of the application does not lend patentable distinctness as such appears well known as taught by Rasmason.

The U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP Chapter 2300). Commonly assigned US patent 7,401,376, discussed above, would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) if the commonly assigned case qualifies as prior art under 35 U.S.C. 102(e), (f) or (g) and the conflicting inventions were not commonly owned at the time the invention in this application was made. In order for the examiner to resolve this issue, the assignee can, under 35 U.S.C. 103(c) and 37 CFR 1.78(c), either show that the conflicting inventions were

Art Unit: 3727

commonly owned at the time the invention in this application was made, or name the prior inventor of the conflicting subject matter.

A showing that the inventions were commonly owned at the time the invention in this application was made will preclude a rejection under 35 U.S.C. 103(a) based upon the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications pending on or after December 10, 2004.

### ***Response to Arguments***

Applicant's arguments with respect to the 112 first paragraph rejection are persuasive. This rejection has been overcome.

Additional minor 112 second paragraph deficiencies have been noted above and should be corrected.

Further, as set forth above, upon review of patent 7,401,376, a double patenting rejection appears proper and must be addressed. Also, as set forth above, an inquiry is made as to who is the first inventor of the conflicting subject matter or whether the inventions were commonly owned at the time of applicant's invention.
